## 3. Pre-drilled holes on the fridge and freezer doors.

## 4. Insert 1x large screw into either one of the handles.

Instructions continue on next page

**5.** Insert 1x spacer the flat side up into the middle hole on the handle.

**6.** Line up the long screw that was inserted in step 4 with the holes on the fridge/freezer door.

**7.** The handle will need to be secured onto the door by the screw, using a screw driver.

**8.** Hook the handle cover onto the handle and align across the top of the handle

Instructions continue on next page

**9.** Push down the handle cover onto the handle to secure it.

**10.** When all steps have been completed, this is the final result.
